Hello,

Add the following CSS rules:

BODY #gkHeaderModule1

```
{  
  float: none;  
}
```

DIV.ux-menu-container

```
{  
  text-align: center;  
}
```

DIV.ux-menu-container UL.ux-menu-horizontal

```
{  
  display: inline-block;  
}
```

PS: We don't have an extension for creating forms.

Custom CSS rules can be added to "CSS Styles" parameter in module settings.

Hello,

If you want to change menu items width, you can read about it [here](#).
