
Wrong sub-menu width in Google Chrome

Posted by erm - 2013/06/06 14:47

Hello!

I meet the issue in Google Chrome displaying submenu "SUPPORT" at the web site <http://www.walkiefleet.com/>
IE10 shows it ok though.

Would appreciate any help!

Hello,

This problem with javascript code which is used by site template for default menu. Remove javascript code for "superfish" menu in site template and the module will work fine.

Regards,
ARI Soft
