## My menu in two rows are overflowing submenu

Posted by Erick - 2013/06/10 12:52

---

Hello,  
my menu has two rows; row below is covering up items of submenu from upper row. I tried to change z-index but it is not working. Submenu is hiding. [http://www.ari-soft.com/images/fbfiles/images/submenu\\_hiding.jpg](http://www.ari-soft.com/images/fbfiles/images/submenu_hiding.jpg)  
Please help.

Hello,  
  
Where we can see the problem?

Regards,

I have no accesss to submenu of item from top row in case of two complete rows, it is problem in horizontal menu.  
Submenu is below second row.

OK, it is example - <http://www.gojadmitrenkoart.com/> below "gggggggggggg" is submenu from "AAAAAAA", it is impossible to see it.

best regards

---

Add the following CSS rule:

```
UL.ux-menu-sub
{
  z-index: 20001;
}
```

Great, working pretty good :)  
Thank you very much !  
best regards  
Eric
