
Can\'t click past the first link on ARI Ext Menu

Posted by OCTECHNOLOGYIT - 2013/06/13 18:43

Please view my site: <http://octechnologyit.com>

On the ARI Ext Menu when you click on a menu item and there are additional items below, you can't click on anything below the first item. Also the submenu seems to be hidden under images on some pages. Help? I love this menu if I could just get this piece to work

Hello,

This problem with site template styles. Add the following CSS rule to fix the problem:

```
body #jsn-content-top
{
  z-index: 89;
}
```

Regards,
ARI Soft
