
Menu not displaying properly after SP Upgrade

Posted by SRD - 2013/06/27 08:25

Hi. I used SP Upgrade to migrate a Joomla 1.5.26 install, to a Joomla 2.5 install.

The menus and modules have migrated okay.

I have installed ARI Ext Menu on the 2.5 version, yet the Top menu is not displaying correctly.

The settings look okay to me.

What could be wrong?

Hello,

Set "Start level" parameter to 1

Regards,
ARI Soft
