Second Menu

_____

Hi,

I'm wondering if it's possible to use a second Menu.

Using J2.5 I've installed the ARI Ext Menu, months ago, and everything is fine, so far.
To create a second Menu I clicked "New" in the Modul Manager and choosed the ARI Ext Menu.
Configured the essentials and saved published.

Now the Menu should appear in the Menu Manager i thought, but it's not working yet.

Did I missed something?

Regards,
Chris

Re:Second Menu

_____

Hello,

It is possible to create as many module instances as you want.

We can investigate the problem on your site if you provide a temporary access to your J! backend by email.

_____

The module uses menus which created in Joomla! menu manager.

Use "Menu name" parameter in module settings to choose which Joomla! menu want to use.

Uuhh,

Thanks a lot.

It' so damn easy if you just think about it for a minute! :woohoo:

This is great Forum!
Thank You!
