## ARI EXT Menu over the top of Flash Banner

Posted by lanL - 2013/07/15 16:28

---

I love ARI EXT menu, thank you.

I have it on my company's site and have just placed a Flash banner on the front page but the menu is hidden or cut short at the top of the banner when viewing with FireFox and Internet Explorer but is OK on Chrome.

Any ideas how this can be fixed?

Site: [www.psil.co.uk](http://www.psil.co.uk)

Many Thanks

Ian.

Hello,

This problem with HTML code the flash object. Add wmode="transparent" parameter for this object.

Regards,  
ARI Soft

Thank you for such a speedy response, setting this option in the Flash object fixed the problem.

:cheer:

Ian
