How to align text horizontally?

Posted by Omelo - 2013/07/18 08:59

_____

Hi!

First thanks for that great menu! I have one problem. When i resize height with

.ux-menu a {
height: 50px;
}
text stays on top. How can I move it in the middle?

One more thing, is there any way I could make seperating lines in png? So it would not be from bottom to top, only in the middle?

Thanks for your answer.

_____

Hello,

Try the following CSS rule:

UL.ux-menu A
{
 height: 50px;
 line-height: 50px;
}

Regards,
ARI Soft
