
submenu doesn't show on hover

Posted by noledam - 2013/07/22 19:13

hello,

I'm using the Ari Ext Menu on a multi language site, which works great.

It also has a submenu. On hover I want to show the submenu, but it doesn't.
How and where can I fix this?

the current url is
<http://smashinglassdesigns.ophetweb.nu/index.php/nl/?lang=nl>

I tried some modifications to the css, and searched this forum but didn't find a solution yet.

Hello,

Update the module to the latest version.

Regards,
ARI Soft

hello,

I checked, as far as I know I'm using the latest verion.
I'm using version 2.2.4.

kind regards Madelon

thanks for the quick reply.
I updated to the latest version now, but it's still not working...
