Hello,

"ARI Ext Menu" is a drop-down menu module. What sense to disable drop-down functionality?

Add the following CSS rule to "CSS Styles" parameter in module settings to hide arrows:

```
UL.ux-menu .ux-menu-arrow
{
    display: none;
}
```

Regards,  
ARI Soft

You can use "Start level" and "End level" parameters to specify from what level menu items should be shown.
