
chance min-width menu

Posted by siepos - 2013/08/10 08:51

Hi,

I would chance the minimum width off the horizontal menu items. I have chance the value, 1px, in the menu.min.css to 15px but there was no visible result.

I would fill out the page with the 6 items.

How can i do that? Can i put anywhere a padding value or???

Thanx

Siepos

A view houres later:

I'f found the solution. It was given earlier here: <http://www.ari-soft.com/ARI-Ext-Menu/34331-width-of-menu-bar.html#34332>

Tanx
