## Main Menu overlapping Sub Menus browser resize

Posted by JohnTimbol - 2013/08/15 07:33

---

Hi, first of all thanks for all the great and free extensions!

My problem is that when I try to resize my browser or view the site on a mobile device, a portion of my sub-menus are inaccessible as they are overlapped by the main menu.

here's a link to the site <http://www.philracom.gov.ph>

A little help would be great... Thanks

Hello,

Add the following CSS rule to "CSS Styles" parameter in module settings:

```
.ux-menu-horizontal .ux-menu-sub
{
  z-index: 20001 !important;
  margin-top: -1px;
}
```

Regards,  
ARI Soft

Wow, that was fast. I wasn't even finished with my coffee.

Problem Solved!

Thanks for the excellent support
