
Help! Totally Clueless On Making Menu Work

Posted by screamingfingers - 2013/08/16 16:09

Hi All,

I have installed the ARI Ext Menu, assigned it to the correct module, but I can't figure out how to get the menu out of the "ARI Ext Menu" box, and then make it extend across the top as with the native menu.

Is it that simple that I can't figure it out?

Please see my attached image for what I mean.

Thanks <http://www.ari-soft.com/images/fbfiles/images/menu-51795b5c87f9f0ce11b2751a019eb559.jpg>

Hello,

It can be a problem with site template styles for selected module position.

Regards,
ARI Soft
