
ext-gecko and ext-gecko3 classes

Posted by Jooshi - 2013/08/25 00:44

ext-gecko and ext-gecko3 classes are added to the body tag. Are these required for the ARI ext Menu? Is there a way to remove them?

Hello,

These classes are added by ExtJS javascript framework which is used by the extension depends on what browser is used. It is not possible to remove them.

Regards,
ARI Soft
