
Menu freeze

Posted by theant - 2013/08/29 08:46

Hello

in some pages the Ari menu freezes, it is not possible to click on any menu item:

<http://www.antonioconacchia.com/portfolio.html>

it is a J! 2.5.14 site with ARI Ext Menu 2.2.5

Hello,

What browser do you use? We have checked it in FireFox and can click menu items.

Regards,

ARI Soft

Yes, there was a sort of conflict with the showcase module, with less items the menu now works fine.

Thanks
