
Background image

Posted by Ander - 2013/09/03 08:16

Im trying to show a background image for the menu instead of the default colours, but the CSS doesn't seem to work. I have to confess im not that good with css or any kind of coding, but i did search around the forums and got some help, but none of the other post replys seemed to work.

Webpage - <http://carrickrugbyclub.co.uk/index.php/u16-news/u16-fixtures>

Code im using

```
.ux-menu a {  
    background: url("/images/school_menu.png") repeat scroll 0 0 #11a0ff;  
    color: #443322;  
    display: block;  
    font-size: 12px;  
    line-height: 12px;  
    padding: 10px 14px;  
    position: relative;  
    text-decoration: none;  
}
```

As i said im not that confident with css or even if it is possible what im trying to do, any help would be great.

Thanks in advance http://www.ari-soft.com/images/fbfiles/images/school_menu.png

Hello,

Set background color to transparent.

Regards,
ARI Soft
