
Hide submenu behind another moduls!

Posted by AbedMatini - 2013/09/04 12:58

Hi

ARI Ext Menu is really perfect and I am really happy, but I have just one tiny problem in sub menu.

<http://test.bodyandmindfactory.com/>

a little part of sub menu of "news & Media" (for example "media kit")go behind the "testimonial moduls" and I do not know what should I do to fix it.

Regards,

=====

Hello,

Add the following CSS rule:

```
.sidebar1>.Block:first-child
{
  z-index: 2;
}
```

Regards,
ARI Soft

Perfect :)

Thank you so much
