
Dropdown menu not showing

Posted by prakash - 2013/09/10 17:53

My menu is not getting changed after installing the ARI EXT Menu module and configuring it.

Please have a look at my site, i.e. alldbest.com and suggest me the fix.

Hello,

Read this post.

I saw the CSS entry suggested to be added. Can you tell me in which file I should add the entry.

Custom CSS rules can be added to "CSS Styles" parameter in module settings.

I have put the CSS entry to "CSS Styles" parameter in module settings.
Now somehow the menu shows. But when I click on Home, or any submenu, the entire menu disappears and only the clicked parent menu stays. Please check the same at <http://alldbest.com/big-data> by clicking on "Home" or a Sub-Menu.

Also, when I hover on a menu, it becomes bold. How to avoid it.

Thanks in advance for your help.

I got the first issue fixed by Setting "Show only active sub-menus" parameter to "No".

Thanks.

Add the following CSS rule:

```
#header .ux-menu A:hover
{
    font-weight: normal;
}
```
