
Home menu item does not work

Posted by impartit - 2013/09/15 21:23

The "Home" menu item no longer displays the "Article" shown on www.impartit.eu where it worked perfectly in the original Joomla menu.

Also the "Contact Us" and "Home" items are adjacent NOT vertically aligned

Hello,

Set "Auto width" parameter to "Yes".

Regards,
ARI Soft

OK many thanks - that has fixed the alignment issue but the "Home" page link does NOT function i.e. return to displaying the Home page Joomla Article.

Sorry, but could you explain what's wrong with "Home" menu item? When the menu items is clicked, home page is opened.

Regards,
AI Soft
