
Freezing on hover

Posted by Zippo - 2013/09/16 17:07

Hi, I'm very satisfied user of your great module but there is one bug, which i'm not able solve it. My site is www2.fbsolomouc.cz.

Problem: When i click on menu item "KALENDÁŘ•X" (jevents) all is well loaded, but when I then go to another item, the submenu items are not loading.

Have you any idea how can I solve it?

Hello,

If you open browser's error console, you can see the javascript error occurs on "Kalendar" page. This error is not related to "ARI Ext Menu", but it prevents execution of "ARI Ext Menu" javascript code. Fix the error and the menu will work fine.

PS: It seems this is a problem with a 3rd party extension (or site templates) which removes MooTools library, but doesn't remove javascript code which is used by Joomla! and uses MooTools library.

Regards,
ARI Soft
