
How to place the Menu the way I want it

Posted by Stony2712 - 2013/09/18 23:06

IÃ´ve been searching through the Forum for some Time now but I couldnÃ´t find any complete working solution... IÃ´m using the ARI Ext Menu on Joomla2.5 and had the Problem that the Menu didnÃ´t appear if I chose the position I wanted it. I found a Solution here and now I can See it and it works but it still is not at the place where I want it to be... I can move it to the right place with Firebug (the right place is "top: -235px; and padding-left: 10px)(if that was some nonsense right now you can look at the pictures.) The Menu should be over my Logo. <http://www.ari-soft.com/images/fbfiles/images/SoSoll.png>

Okay, after trying a bit more I made it myselfe, I had to change the following Code:

body #header

```
{
  overflow: visible;
}
#header ul.ux-menu
{
  top: -200px
}
#header ul.ux-menu li a:link,
#header ul.ux-menu li a:visited
{
  display: block;
  padding: 10px 14px;
```

```
}
```

```
#header ul.ux-menu li a.ux-menu-link-parent:link,
#header ul.ux-menu li a.ux-menu-link-parent:visited
{
  display: block;
  padding: 10px 24px 10px 14px;
}
```

```
#header .ux-menu ul.ux-menu-hidden
{
  display: none;
}
```

```
#header ul.ux-menu
{
  right:-10px;
```

Hello,

Do you need any assistance from our side ?

Regards,
ARI Soft

No, I don't need it anymore because I found a way to fix my Problem (I just was tired of trying and so asked for some Help but a few tries later the I found a Way:))
Thank you
