
Font

Posted by ichabi - 2013/10/08 10:39

Hey,

So I'm working on this site where I use ARI Ext Menu (<http://31.186.174.178/~dewaco1q/>)
I already have the font Arial, but how can I change the font to Bebas (<http://www.dafont.com/bebas.font>)

the css styles are;
.ux-menu-container .ux-menu a
{
background: none;
border:none;
margin: 67px -70px 0 117px;
}
UL.ux-menu LI A
{
font-family: 'Arial';
}

So how can I realise this ?

=====

Hello,

You can read here how to load custom fonts.

Regards,
ARI Soft
