
I can only use the Mainmenu

Posted by multivac - 2013/10/09 22:44

hi,

I need to create multiple menus for a website with several languages but only works when I select the mainmenu. With other menus not working. :huh:

thanks a lot :)

Hello,

Could you provide a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

hi,

This time I have the website locally. When I uploaded to the server notice.

Thank you very much :)

Hi,

I installed it again and now all is well. I think it did not work because I named the menus using "Ã±" :huh:

Greetings and thanks
