
Joomla 3.2 Beta: Class '\JSite\' not found

Posted by GJSchaller - 2013/10/14 17:16

When using ARI Ext Menu on a Joomla 3.2 Beta test site, I am getting the following error:

Fatal error: Class 'JSite' not found in
/home/j3/public_html/modules/mod_ariextmenu/mod_ariextmenu/kernel/Menu/class.Menu.php on line 227

I made sure I downloaded the latest version of the Menu (2.2.8), but am still getting this error.

Thank you for your help!

provisory fast fix :

chnage in file - modules/mod_ariextmenu/mod_ariextmenu/kernel/menu/class.menu.php

old line 217 - \$router = ::getRouter();

to new line 217 - \$router = JApplication::getRouter();

v. 2.2.9 compatible with J! 3.2.

PS: Currently only beta version of Joomla! 3.2 is available.

Regards,
ARI Soft
