
How to extract a cell value from csv file?

Posted by rscampanero - 2013/10/16 09:28

Please help me.

I don't know how to show a value of a cell on my article.

There is a list of prices on csv wherein i just want to get one particular price and show it on my joomla article.

e.g.

intermediate,Normal,Advanced

100,200,300

i just want to get the value of "normal" which is "200"

How do i go about it?

Please help.

Hello,

Does the CSV file contain only two records?

Thanks for the response. I have attached an image and the csv file so you can see clearly what i wanted to do.

highlighted with yellow are the values i wanted to extract from the csv file and placed it on my joomla article.

I have also attached the actual csv file for your reference.

Thank you in advance for helping me.

Below is my csv data of the image above:

S NO,PROGRAMMES,AWARDING BODY,DURATION,LOCAL FEE,INTERNATIONAL FEE,"MEDICAL
INSURANCE",LAB,"EXAM

FEE",STUDENT DEVELOPMENT FEE,UNIFORM,COURSE MATERIAL FEE,"MEMBERSHIP
FEE",TOTAL LOCAL FEE,TOTAL INTERNATIONAL FEE

1,English Language Proficiency,College,6 months,NA,"\$4,500",\$100,NA,Pay to MOE,\$150,NA,\$250,NA,NA,"\$5,000"

2,"Preparatory Course for G.C.E ""O"" Level Examination",Cambridge,10 Months,"\$4,500","\$8,000",\$100,\$500,Pay to
MOE,\$150,NA,\$250,NA,"\$5,500","\$9,000"

3,"Preparatory Course for G.C.E ""O"" Level Examination",Cambridge,18 Months,"\$8,000","\$9,800",\$100,\$800,Pay to
MOE,\$150,NA,\$500,NA,"\$9,550","\$11,350"

Do you want to show a table based on data from the CSV file, but hide "AWARDING BODY" and "UNIFORM" columns?
or you want to select only one records with "S NO" equals to 2 and show it in an article?

from that csv files if want to select one record based on "S NO"
then i want to show data from some column only but not all.

e.g.
S.No | Programmes | Total Local Fee | Total International Fee

The extension doesn't support this ability. It is possible for data from a database.
