## Submenu not completely showing

Posted by eppie03 - 2013/10/21 18:32

---

Hi,

My submenu items are not showing. They stay behind my banner.

How can make sure the ARI Ext Menu is on top and not behind the banner?

Thanks in advance.

The url is: [www.joyhosting.nl](http://www.joyhosting.nl)

Hello,

Add the following CSS rules:

```
BODY DIV#header,  
#header .top  
{  
    overflow: visible;  
}
```

```
#header .ux-menu a  
{  
    line-height: 12px !important;  
}
```

Regards,  
ARI Soft
