
ARI Ext Menu for Arabic site problem

Posted by hmjundi - 2013/10/23 07:13

Dears,

I have installed ARI Ext Menu module on my website, and it is bilingual (English and Arabic). On the English site, it works perfectly, as I added custom styling to it.

However, on the Arabic site (<http://66.135.55.135/~samama52/index.php/ar/>) I cannot find the section in the CSS or anywhere in the module files on how I can get the sub-menu items to be aligned to the right. Also, the background behind the sub-menu items is aligned to the right, when it's supposed to be aligned to the left. I tried adding an alternate css file named (menu.min_rtl.css) with the corresponding alignments, but with no success.

Can you please help me with this?

Regards,
Hadi

Hello,

Do you want to specify custom CSS rules for RTL languages only?

Hi,

Actually the website is in two languages, where ARI ext menu is installed to work for both. I need the CSS to be specified for both languages, displaying the alignments for both language directions.

Mainly, I was able to override the text alignment for the Arabic site, but the only thing I'm stuck with now is the grey background in the drop down effect to be aligned to the left. Please make a mouse-over to the navigation menu installed on my website to clarify further.

Regards,
Hadi

Hello,

I would like to know if there are any updates regarding this?

Regards,
Hadi

Please see the attached image to clarify my request. In the English site it's fine but the Arabic site, whose text is RTL direction, the right border of the grey drop down menu (as seen in the image attached) is not aligned with the right border of its parent menu item.

Add the following CSS rule:

```
UL.ux-menu-horizontal UL.ux-menu-sub
{
  left: auto !important;
  right: 0;
}
```

Dear Sir,

Thank you.

Can you please specify in which file do I place this code?

Regards,
Hadi

For example to `/templates/samama/css/samama_rtl.css` file.

Dear friend,

Thank you once again for your valuable help.

I'm just left with one last thing to do. How do I align the text to the right instead of left? what code should I place?

Regards,
Hadi

Dear Friend,

Nevermind about my last request, I managed to have that done from the back-end.

Again, Thank you. God bless.

Regards,
Hadi
