
Basic adjustments with ari menu.

Posted by bugmenot - 2013/11/04 08:18

So basicly all I need to know is CSS script that will allow me to adjust hight and lenght of my ari vertical menu. I would like to know how can I change spacing on the top of menu. Ill paste screenshot in here with all the things I would like to know ! Thanks in advert !

I marked places that I would like to "remove" with red color.

With blue color I marked places that I would like to change (lenght/height)

If you would like to check the website here's link for it:

<http://zso7.home.pl/gim6/>

THANKS !

Btw. Could you give me the rule about removing that white edges on these arrows ?

Hello,

Use the following CSS rule to remove space (it is added by site template) between menu items:

```
UL.ux-menu LI
{
  margin: 0;
}
```

You can read here how to change menu items width.

Information about menu HTML layout and CSS classes is available here. It can be used if you want to customize the menu.

Use the following CSS rule:

```
UL.ux-menu LI A
{
  line-height: 30px;
}
```
