
Dropdown/submenu doesn't show up.

Posted by IsItFast - 2013/11/06 04:09

Not sure if I am misunderstanding but I don't get any type of list when I hover over my main menu. I have to physically click on the menu to get it to take me to a list page. Do I need to activate the submenu somewhere or am I simply doing something wrong?

Hello,

The menu doesn't contain sub-menu items. Menu items are created in Joomla! menu manager.

Regards,
ARI Soft

Lol. I guess I wasn't thinking last night. All the menus I have built with submenus before were done in Joomla 2, so the layout didn't look right in Joomla 3. I see now. Thanks.
