Menu overlapping

Posted by tours - 2013/11/07 05:15

_____

My dropdown submenu isn't showing on top of the main menu-making the submenu item hidden and not clickable. The problem is on the about us link which has submenus which get hidden below the contact us menu item. click on the link to view it.

_____

Hello,

Add the following CSS rule to "CSS Styles" parameter in module settings:

```
UL.ux-menu-sub
{
 z-index: 20001 !important;
 margin-top: -1px;
}
```

Regards,
ARI Soft
