Menu hovers over popups

_____

Hello,

The menus are hovering over popups that I have set to display on the site, such as registered attendees and terms and conditions. How do we make the menu's go back one layer, or not cover up the popups?

Picture is attached.

Thank you,

Hello,

Send a link to a page where we can see the problem.

I found it, I changed the z-index and now the main menu is properly hidden under the popups.
