
Dropdown menus grouped together on Mobile device

Posted by tours - 2013/11/16 10:10

Hi, All the drop down parent menu items are grouped or stacked together when viewed on my mobile - in single clickable link. The other menu items without sub-menus work fine. Where could be the problem?
The menu item work fine on desktop.

Hello,

Where we can see the problem?

Regards,
ARI Soft

Hello,

The page doesn't contain "ARI Ext Menu" module.

Regards,
ARI Soft

Thanks for your quick reply. I changed templates and just realized that the ari ext menu module was displaced by the menu template design. Am trying to figure out how to make the template menu work, though.
