Language switcher not working

Posted by albertorp - 2013/11/27 02:49

_____

Hello
I have set up the ext menu. It is fantastic.
However, the language switcher by the right is not working when this extension is active.
You can see that in:
http://aprendizaje360.com/ this module is enabled, and the flags do not work
But in:
http://www.aprendizaje360.com/index.php/ca without the menu, the flags do work

Please, help!

_____

Hello,

This problem with site template styles. Try to add the following CSS rule to fix the problem:

#jf-header .ux-menu-container
{
 float: left;
}

Regards,
ARI Soft

_____

Hi
Great!
It did work.
Thanks a lot!
