
Sub menu is not working

Posted by sergiodefenders - 2013/12/04 13:24

First of all, Hi everyone, first post here!. Love this extension, one of my favorites, I have used it in a bunch of site but now, in a particular site there's some issue. Sub menu it's not working, I check other thread to find some solution, but they didn't work. Can you please take a look my site and help me?, Thanks in advance!

Hello,

This problem with site template styles. Add the following CSS rules to fix the problem:

```
.navegacion .moduletable
{
  overflow: visible;
}
```

Regards,
ARI Soft
