
Every item is overlapping

Posted by msowa - 2013/12/04 23:56

Hi :)

I'm preparing a site for family owned start-up and I really wanted to use ARI Ext Menu but I have a problem it. On my website (<http://salonprestige.com.pl/>) under "LASEROTERAPIA" menu we should be able to see couple of sub menu items... which are clearly overlapping :/

Is there a way to fix this? :D

Tahnk you in advance ! :D

Hello,

This problem with site template styles for default menu in selected module position. Open index.php site template file, replace the following code:

with the following one:

and add the following CSS rules to "CSS Styles" parameter in module settings:

```
UL.ux-menu LI
{
    margin: 0;
    list-style-type: none;
}

UL.ux-menu UL.ux-menu-sub
{
    z-index: 20001;
}
```

Regards,
ARI Soft

Worked like charm!!!
Awesome!

To change the color of the bordered should I write something to CSS styles parameter or change the css file itself?

Try the following CSS rule:

```
UL.ux-menu a
{
border-color: red;
}
```

I messed it again :/
Even when the title is off (theme option) and the code provided is still saved.
I could not find the way to activate it in proper way.

Are you able to help me with this one?

This problem with site template and selected module position. We can recommend to contact site template developers so they fix the problem.

Regards,
ARI Soft
