
Problem with positioning menu

Posted by sugarus - 2013/12/10 10:29

Hello.

I want to replace standart Joomla menu with Ari Ext. But I have faced problem.
I joose right order, menu type but Ari menu appears higher that it should ne.
On screenshot I outlined the place where it should be.
Thanks for any help in advance.

Hello,

Send a link to a page where we can see the problem.

Regards,
ARI Soft

The module is shown according to select module position. Modules positions are defined in site template. If you want to change position of the module, add the following CSS rule to "CSS Styles" parameter in module settings:

```
.header .ux-menu-container
{
  top: 105px;
  left: 260px;
}
```
