
Try to show submenus but doesn't

Posted by Sikandar - 2013/12/16 11:51

Hi guys and many thanks for share this module :)

I install it, and think configure it fine, but I use FPSS in frontpage and menu try to show, but my slider doesn't let it...
ecolombiatours.com is the web. Can you please take a look and give me a hand?

Many thanks again :)

Hello,

What browser do you use? It works fine in FireFox browser.

Regards,
ARI Soft

It seems this problem with Joomla! cache or a cache extension which is used on your site. If you open HTML source of the page, you can see it contains the same javascript code several times (for "ARI Ext Menu", FPSS and other extensions). It is incorrectly.
