Problem ARI ext menu horizontal

Posted by chriske81 - 2013/12/19 23:12

_____

Hi,i have install the ARI ext menu module in joomla 3.2. I get the menu blocks not against each other. do you have an idea for? I have already tried everything but get this not ready, also the submenu items are there very strange on. above the banner you see this I want to replace the normal menu by your menu because it works better.Can you help me please? Thanks.

_____

Hello,

Add the following CSS rule:

.ux-menu LI
{
 padding: 0;
}

Regards,
ARI Soft
