
Submenu Dissapears on mouse move from parent

Posted by HaydosR - 2014/01/09 01:51

Hi All,

Having a problem where the submenu disappears if you move your mouse too quickly from the parent item down to the child.

I though this may have something to do with the 1px margin between the parent and child elements but I've modified the css and this has made no change.

is there a way to erradicate my issue? Im fairly proficient with JS and CSS.

Thanks in advance

Hello,

Where we can see the problem? What browser do you use?

Regards,
ARI Soft
