
Issues with alignment and menu not showing

Posted by JudeSmith - 2014/01/12 02:07

Hi,

Have just set up the menu on www.suretank.com and I want to know if there is a way to get the menu to run full width without doing any coding (I am not a coder)?

Also, the menu is not appearing on some of the sub-pages, for example <http://www.suretank.com/ccu-s/closed-containers>

Can you help please?

thanks

Hello,

Information how to change menu items width is available [here](#).

Regards,
ARI Soft
