
Submenu not working on all pages...

Posted by lisausmc - 2014/01/21 00:14

I'm sure this has been covered, but I haven't found a fix. Once I click on a sub-menu the I can't get to any of the other sub-menu items without going back to home. Incidentally this only happens on the email sign up menu item and any page linked to through the sub-menu please help.

Hello,

This problem with phoca slideshow extension. It uses an incorrect javascript code to attach to window load event and it causes javascript errors.

Regards,
ARI Soft
