
Ari menu hovering over main main drop down items.

Posted by bsaracco - 2014/01/28 00:21

Greetings,

I am using joomla 2.5 yootheme's nano2 theme.

I have the ari menus published in the inner bottom module position. The small problem I am having is that my ari menus hover on top of my other main menu drop down items. Is there a way I can stop this? Thank you for your great free extension!

Hello,

Send a link to a page where we can see the problem.

Regards,
ARI Soft

Thanks for the quick reply!

The solution below fixed
it. Excellent customer service! :lol:

Add the following CSS rules:

```
BODY #header
{
  z-index: 2;
}
```

```
BODY #main
{
  z-index: 1;
  position: relative;
}
```

Regards,
