
Ari Ext Menu - hides behind iframe IE

Posted by MrJensen - 2014/01/30 20:49

I'm using Ari Ext Menu on a website and think it is an excellent menu. However, in Internet Explorer the dropdown menu goes behind a youtube movie (in an iframe). Can anyone please tell me how to solve this problem?
-Thanks! <http://www.ari-soft.com/images/fbfiles/images/videoundermenu.jpg>

Hello,

Send a link to a page where the problem occurs.

Regards,
ARI Soft
