
Active menu

Posted by tomkarz - 2014/02/08 08:50

I want to have a thick line in red color underneath the active link in the menu. How can I do that with css?
See the attached image!

Hello,

Add the following CSS rules to "CSS Styles" parameter in module settings:

```
UL.ux-menu LI A.current,  
UL.ux-menu LI A:hover  
{  
    border-bottom: 2px solid red;  
}
```

Regards,
ARI Soft

Thank you for fast support. Worked fine except for the size! It's a little bit to long. How can I get it to be the same size as the text in the menu?

It requires modification of the extension.

But if I don't want to have the red line under when I hover over some other word in the menu. I've tried to remove the hover in the css, but then its not working with active link.

Use the following CSS rule:

```
UL.ux-menu LI A.current
{
border-bottom: 2px solid red;
}
```

instead of:

```
UL.ux-menu LI A.current,
UL.ux-menu LI A:hover
{
border-bottom: 2px solid red;
}
```
