Submenus not appearing

Posted by Amema - 2014/03/26 15:52

_____

Hi,

I found this thread here about the same issue, but am not sure if the same solution applies to this problem:

I am trying to use EXT menu in a JSN template. No submenus want to pop out no matter what.

_____

Hello,

Where we can see the problem?

Regards,
ARI Soft

_____

http://esse.esperantonordio.org/stella/

Aktivi has got two submenus and one of them has yet another one, so two layers of submenus.

_____

The page contains javascript error. The error is not related to "ARI Ext Menu", but it prevents execution of "ARI Ext Menu" javascript code. You can see the error in browser's error console (it seems the error is caused in modalizer extension). Fix the error and the menu should work fine.

Regards,
ARI Soft

_____

Thanks a lot!

I looked around but haven't got enough knowledge to actually hack anything myself. The critical operator though was "modalizer". I checked the plugin manager and found the Modalizer, unpublished it and voilÃ¡, EXT menu works.

I'm having the same issue.

I can't figure out where the problem is.

_____

Add the following CSS rules:

```
#ja-left1,
#ja-left,
UL.ux-menu LI {
 overflow: visible;
}

.ux-menu-container UL {
 margin: 0 !important;
}

UL.ux-menu LI {
 padding: 0 !important;
 margin: 0 !important;
}
```

After trying everything that I can think of, and looking through some of your threads I still cannot fix my issue. My Menus with dropdowns worked perfectly for months, and im not sure why, maybe an update my main menus no longer drop down.... Can you take a look for me and see if you might give me some guidance? wwww.totalwall.com

The Main Menus up top have submenus that drop down.... Thanks in advance for your support

Hello,

Open browser's error console (press F12 into a browser) and you will see it contains javascript errors. These errors are not related to "ARI Ext Menu", but they prevent execution of "ARI Ext Menu" javascript code. Fix the errors and the menu will work fine.

Regards,
ARI Soft

Hi, having same problem and I can't find any conflicts. There should be dropdown submenus on both the top and the side.

_____

Hello,

We see sub-menus. What browser do you use?

Regards,
ARI Soft

Hello.. Any help here would be appreciated tremendously.

Sub-menus quit functioning a while back and cannot figure out why.

I do see I have two errors and am trying to figure those out as well....

Can you take a look and let me know what you think?

wwww.totalwall.com

Thanks,

_____

Hello,

The menu doesn't work because "ARI Ext Menu" javascript code is not executed due to javascript errors on the page. Fix the errors and the menu will work fine.

Regards,
ARI Soft
