
Submenu not working in Firefox Mac

Posted by blin - 2014/06/20 18:35

hello,

Sorry for my english google translation!

I installed the module. It works fine on all browsers except one: firefox. Firefox on pc with no problem on my mac against the menu does not take place. I have many mac user coming to my site so I'd found the problem. Can you help me? Thank you in advance.

Hello,

This is a bug in FireFox v. 30 and it will be fixed in FireFox v. 31. This problem is described here.

Regards,
ARI Soft
