Pull down menu doesn\'t work on Surface Pro

_____

Hi,
I have used ARI Ext Menu on my site for a long time and it worked fine. But now I get complain from people with a Surface Pro tablet (Windows 8.1, IE11).

The problem is that the menu pulls down on touch but you can't select a subitem (menu disappears).

I searched the internet for a solution and found this:

For developers wanting to make their dropdowns work on the Surface:

Add aria-haspopup="true" to the top level menu items and aria-haspopup="false" to the secondary menu items.

Example:

Contact Us

Email
Telephone
Online Form
Snail Mail Address

My question is how to add "arie-haspopup" to the code (which file) for this solution to work?
Or do you have another solution?

Thanks for your help.
Regards,
Jake

Hello,

See \modules\mod_ariextmenu\tmpl\menu.php file.

Regards,
ARI Soft
