Hi guys.

First of all, thanks for amazing ARI Ext Menu. I love it. I'm sorry bothering you, but I have problem with submenu in IE 8, which doesn't appear. It works like charm in others browsers (including IE 7).
I'm new in joomla and all this plugin, modules thing and know only basic in HTML / CSS / JS or PHP. So I don't what why is this happening. How should I fix it?

(Menu " LÃ•NKY" has 3 submenus)

Thanks for you time

Hello,

It can be a problem with site template styles or a 3rd party extension. You can use developer tools (press F12 in IE browser) to investigate this issue.
