Submenu not showing, conflict with the templates?

Posted by ricola510 - 2014/09/24 08:45

_____

Hi!

I'm having a couple of problems. Tried many solution indicated in this category but non has worked!

1. Submenu not showing (only ">" appears. Maybe the rest goes under the area next to this?).

2. Main menu has ">" as well and can't delete them.

3. No space between the left edge and menu texts.

At the moment I have these codes for CSS styles as auto width didn't function;
#{$id} LI.ux-menu-item-level-0
{width: 170px;}
#{$id} LI.ux-menu-item-level-1
{width: 100px;}

My test site address; http://www.siltest.com/boats/racing-shells.html
There are two vertical menu on the left hand side and "ARI Ext Menu" is the one I need to get fixed.

Thank you for your help in advance!

_____

Hello,

These problems with site template styles. Add the following CSS rule:

BODY #colleft .row4,
BODY #colleft .row4 .moduletable,
BODY #colleft .row4 .ux-menu-container UL {overflow:visible;}

Regards,
ARI Soft

_____

Hi,

Thank you!
The submenu is appearing.
