## menu floats on top of image gallery

Posted by lovemark - 2014/10/08 12:29

---

the ARI ext menu floats on top of my image gallery lightbox on my site, thus covering part of my graphics.  
(click any image here to see what I mean:)  
<http://www.tesla-k.org/index.php/en/graphics>

How do I get the menu under the graphics (i.e. not visible when graphic is in view?)

=====

Hello,

Decrease value of "z-Index" parameter in module settings. For example set it to 5000

Regards,  
ARI Soft
